Motorized Pergolas

OPEN SKY transforms your outdoor spaces into functional, comfortable, and sophisticated experiences. We design motorized pergolas that integrate architecture, technology, and comfort into one seamless system.

Inspired by the Florida lifestyle, our solutions adapt to you: 100% customizable structures, smart control from your smartphone, and high-performance louvers that regulate light, ventilation, and protection with total precision.

Each project is crafted in our family workshop, with attention to every detail to ensure durability, aesthetics, and flawless performance.

Free-Standing Pergola

Independent system supported by 4 standard columns.

3 Standard Colors

Custom Colors: Choose from over 400 customizable shades within the RAL color system.

Wood Grain Finish

Choose from over
20 premium wood-grain finishes.

Wall-Mounted (1 Wall)

System mounted to one wall with front support of 2 columns.

3 Standard Colors

Custom Colors: Choose from over 400 customizable shades within the RAL color system.

Wood Grain Finish

Choose from over
20 premium wood-grain finishes.

Mounted to Two Walls

Integrated installation using two existing wall structures.

3 Standard Colors

Custom Colors: Choose from over 400 customizable shades within the RAL color system.

Wood Grain Finish

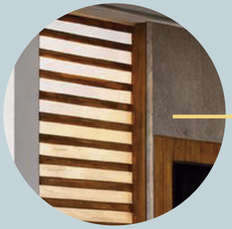
Choose from over
20 premium wood-grain finishes.

Special Column Design

Advanced design option with custom-style columns for exclusive projects.

Accesories

TV Walls
Dedicated structure for screen mounting.



Integrated Fans
Ceiling fans.

Motorized Screens
Retractable screens.

Integrated Audio System
Speakers integrated into the columns.

LED Lighting System
Integrated lighting system.

and Add-ons

How It Works

Our motorized pergolas adapt to every moment of the day. With a single touch, aluminum louvers rotate from fully closed to fully open — giving you complete control over light, shade, and airflow.

0°
Closed

Full protection from sun, rain, and weather.

45°
Filtered

Soft light and natural airflow. Shade without darkness.

105°
Open

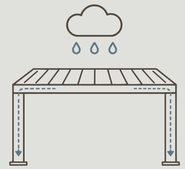
Maximum ventilation and open sky above you.

Rain or Shine

Built for Florida skies. When the louvers close, rainwater channels through internal grooves along the beams and drains discreetly through the columns — so your space stays dry, clean, and ready for the next moment.

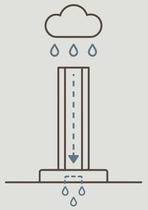
Collection

Louvers close, directing water to the side beams.



Channeling

Beams channel water toward the columns.



Discharge

Water drains hidden, through the base.

Designed to handle every kind of sky.

Smart Sky

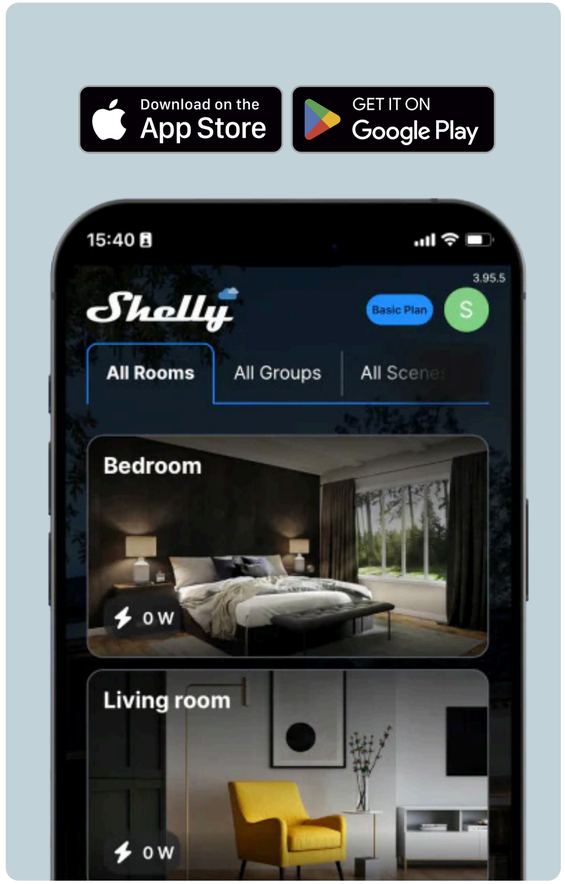
Technology that adapts to your lifestyle

Our motorized pergolas integrate an intelligent system designed to provide total control, maximum comfort, and automatic protection.

Smart Sky transforms your outdoor space into a dynamic environment where everything responds to you—even when you're not there.

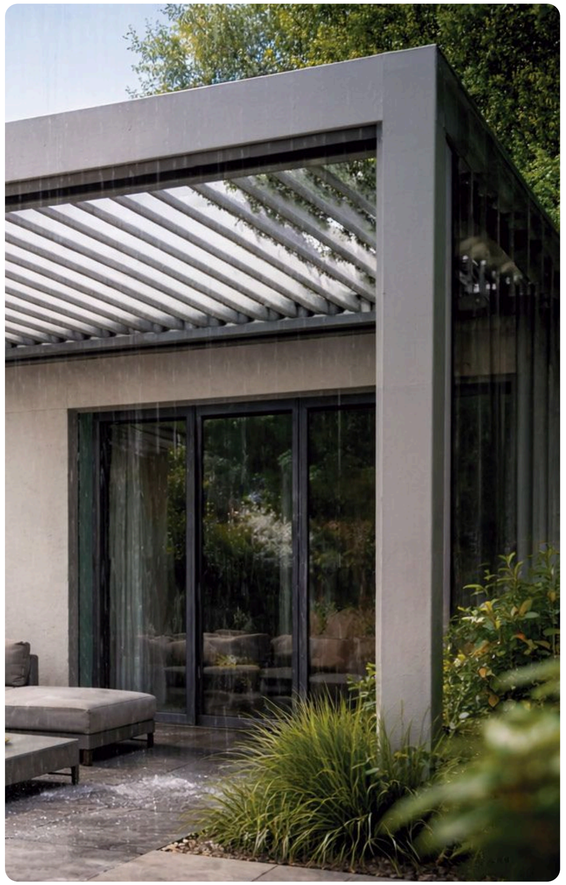
Total Contol

Open and close the louvers using wall-mounted buttons or designer switches.



App Shelly

Full control from your smartphone to automate functions.



Weather Intelligence

Your pergola stays connected to real-time weather through the Shelly app. Get instant alerts and close your louvers from anywhere, even before the first drop.
